JAMES BOYLE NAMED NMMC'S  
NOVEMBER EMPLOYEE OF THE MONTH

TUPELO, Miss.— James Boyle, programmer analyst and team leader with North Mississippi Medical Center's Management Information Systems, was named NMMC's Employee of the Month for November.

Boyle joined NMMC in 1994. He is a graduate of Vardaman High School and earned a bachelor's degree in computer science from the University of Mississippi in Oxford.

"I try to do the best job I can and try to make a difference in what I do. What I love most about my job is the people I get to work with and the variety of the projects that MIS is responsible for," Boyle said. "When I left my previous job as a software engineer in 1994, I was looking for a position that would allow me to make a contribution to the community rather than simply crunching numbers. Working in MIS at NMHS has given me the opportunity to serve with a very talented group of people while accomplishing the goal I set for myself back in 1994."

In his nomination, co-workers emphasized Boyle's integrity and work ethic.

"Having worked with James for the past many years, he is at the top of his game in terms of systems analysis and custom programming. He is the finest of what MIS has to offer," one co-worker wrote in her nomination of Boyle. "His programs are meticulously conceived and written, beautifully crafted and artistically presented."

"I have worked with James for 15 years and have never heard him say 'that's not my job' or 'no, I can't help you.' He is an anchor in our department and helps his team members solve problems 24 hours a day," another co-worker wrote. "He has helped out multiple times when on vacation and has never turned anyone down when they needed help. In our area this is critical as it is up to us to make sure all the programs and applications that service our patients are working at all times."

Boyle attends Duncan Hill Baptist Church in Calhoun City.
