DOUG LILES NAMED
NMMC'S NOVEMBER EMPLOYEE OF THE MONTH

TUPELO, Miss.—Doug Liles, a system technician in Facility Operations, has been named November's Employee of the Month at North Mississippi Medical Center.

Liles, a Belmont native, joined NMMC in 2006.

“What I love most about my job is the people, customers and coworkers, that I have the opportunity to interact with on a daily basis,” Liles said. “When you're surrounded by great people, it makes coming to work something to look forward to. I also have great pride in being an NMMC employee.”

Liles graduated from Red Bay High School in Alabama and earned an associate's degree in electrical technology from Northeast Mississippi Community College in Booneville. He is a certified universal HVAC technician by the Environmental Protection Agency.

“Doug sincerely desires to help everyone he comes in contact with,” Todd Davis, director of Facility Operations, said in Liles' nomination. “Regardless of what happens, no day is a bad day. When anyone in our department needs help, Doug is always among the first to volunteer. Doug is an eager learner and sets the expectation of excellence for himself.”

“Doug is a friendly, happy person who is always willing to help out in any area of the hospital,” coworkers said in his nomination. “He is very prompt in answering his pages and efficient in his work. Doug is a reliable individual and when he says he will fix something he usually does in a timely manner. He truly seems to enjoy his job and is a team player.”

Liles and his wife Lori have two daughters—Lydia, 7, and Addyson, 3. The family attends First Baptist Church in Red Bay, Ala.

“I try to do things right and make sure everybody’s satisfied with the work I do,” Liles said. “Everybody in our department works together. That’s what makes our job good. It shouldn’t be Employee of the Month, but Department of the Month.”
